

UNITED STATES
DEPARTMENT OF THE INTERIOR
OFFICE OF THE SECRETARY
BOARD ON GEOGRAPHICAL NAMES
WASHINGTON 25, D. C.

October 6, 1943.

Mr. Lewis A. McArthur,
Secretary, Oregon Geographic Board,
Public Service Building,
Portland, Oregon.

My dear Mr. McArthur:

Your letters of September 28 submitting additional information regarding Strait of Juan de Fuca, Coast Ranges, and Mohave are at hand. As soon as possible these problems will be investigated and you will be informed of the Board's action on each.

Your letter regarding Bugby Hole, Oregon, and one from Headquarters, Twenty-ninth Engineers, were received today. The Engineers indicated that Bugby Hole is a proper name for a creek, an inlet, a triangulation station, and a former flag stop on the S. P. and S. Railroad, as well as a deep hole in the Columbia River. Do you have any information which will confirm the Engineers' report that a creek 650 feet south of the triangulation station, and the inlet into which it flows, are known locally as Bugby Hole Creek and Bugby Hole Inlet?

We appreciate your cooperation in checking the Sixth Report and in securing information on local geographical names.

Sincerely yours,

(SIGNED) MEREDITH F. BURRILL

Meredith F. Burrill,
Director.
